

simple markdown editor with preview, implemented with React.js and TypeScript. This React Component aims to provide a simple Markdown editor with syntax highlighting support. This is based on textarea encapsulation, so it does not depend on any modern code editors such as Acs, CodeMirror, Monaco etc.

Features

- Indent line or selected text by pressing tab key, with customizable indentation.
- ♻ Based on textarea encapsulation, does not depend on any modern code editors.
- Does not depend on the [uiw \(https://github.com/uiwjs/uiw\)](https://github.com/uiwjs/uiw) component library.
- 🚗 Automatic list on new lines.
- 🐱 GitHub flavored markdown support.
- 🌙 Support dark-mode/night-mode @v3.11.0+.
- Support [next.js \(https://github.com/uiwjs/react-md-editor/issues/52#issuecomment-848969341\)](https://github.com/uiwjs/react-md-editor/issues/52#issuecomment-848969341), [Use examples](#) in [next.js \(https://nextjs.org/\)](https://nextjs.org/).

Quick Start

```
npm i @uiw/react-md-editor
```
